ABSTRACTED-PUB-NO: DE 29805782U

## BASIC-ABSTRACT:

A dietary food supplement based on cereal flakes contains (per 100 g flakes) 20-1000 mg L-carnitin and 100-3000 mg lecithin.

ADVANTAGE - The presence of L-carnitin and lecithin helps with the conversion of body fat into energy and increases the useful conversion of sugar taken in by the body. L-carnitin also contributes to a reduction in subcutaneous fat, stimulates heart muscle activity and improves the resistance of the body to the effects of physical exertion.
